

Ogbodo Uchenna

Senior Software Developer

ogbodouchenna1425@gmail.com | <https://linkedin.com/in/uchennaOgbodo> | <https://github.com/Osinachi-cloud>

Professional Summary

An agile Software engineer fluent with Java and Javascript frameworks. A supportive and enthusiastic team player dedicated to streamlining processes and efficiently resolving project issues.

SKILLS

Technologies: Java | Typescript | Javascript | Spring Boot | Microservice | Postgres | Oracle | Mysql | RabbitMQ | Kafka | Java Quartz Bean | Rest API | GraphQL | React | Angular | Swagger | AWS | Docker | Git | CI/CD | Mockito | Junit.

Soft Skills: Excellent communication | Team collaboration | English | Scrum | Jira | Github | Kanban methods

WORK EXPERIENCE

Senior Software Engineer

Interswitch Group

May 2025 - Present

- Engineered an event-driven pipeline processing 100M+ records daily with near real-time performance.
- Built fault-tolerant event consumers ensuring 99.99% uptime for critical data workflows.
- Scaled distributed processing system to handle 3× peak record throughput without downtime.

Senior Software Engineer

UBAgroup

October 2022 - May 2025

- Implemented concurrent, low latency applications with short loading time.
- Developing GraphQL and rest services using multi-modular architecture.
- Developed an Admin dashboard for monitoring, managing and configuration system for a fintech product.
- Developed a complete secure payment system for ecommerce and fintech applications.
- Enhanced applications and improved performance using testing and validations against requirements and performance standards.
- Designed and developed secure services and endpoints to ensure safety of user's data.

Java Software Developer

ExquisAppFactory (Billanted)

March 2022 - September 2022

- Implemented concurrent, low latency applications with short loading time.
- Developing GraphQL and rest services using multi-modular architecture.

- Developed an Admin dashboard for monitoring, managing and configuration system for a fintech product.
- Developed a complete secure payment system for ecommerce and fintech applications.
- Enhanced applications and improved performance using testing and validations against requirements and performance standards.
- Designed and developed secure services and endpoints to ensure safety of user's data.

Full stack Software Developer

Subsidian Financial Technology LTD

December 2020 - February 2022

- Designed and developed Highly concurrent, low latency microservices based applications using spring boot Rest API and React.
- Implementing and integrating an end to end Performance testing suite that reduced regression.
- Collaborating with the team to adapt existing client's applications to changing industry standards reducing operating costs and improving functionalities.
- Developed highly-responsive, cross-platform, cross-browser compatible, emotive user interface using React and spring that prolifically generated leads.
- Design and development of data models in Java Hibernate to create a minimum viable product.
- Documents business requirements, gatherings and issues and updated business process flows.
- Working closely with the peers, product manager, and QA engineers to shape the product.
- Idea generation with peers and other stakeholders to identify areas that require improvement.

Full stack Developer

C-stemagic

January 2020 - December 2020

- Review and evaluate technical design, technical quality and processes.
- Updates with documentations in response to new release versions and best coding practices.
- Develop and implement enterprise applications with Spring boot restful services and React.
- Monitoring, Troubleshooting and improving application performance for better user experience.
- Collaboration with a remote product team to implement new features into existing infrastructure.
- Developed and implemented applications with third party APIs like payment and email update systems for start-ups using React and Spring.

EDUCATION

Ahmadu Bello University, Nigeria.

Masters of Business Administration - MBA

2024 - 2026

University of Port-Harcourt, Nigeria.

Bachelor of Engineering - BE, Chemical Engineering

2011 - 2016
